GAISAR TEKNOLOGI BERSAMA

Gaisar Teknologi Bersama adalah perusahaan IT dan penyedia layanan internet (ISP) nasional yang menawarkan konektivitas andal bagi pengguna residensial hingga korporat di Indonesia. Layanan utama mereka mencakup penyediaan infrastruktur jaringan fiber optik dan nirkabel, serta jasa pemeliharaan aset penting seperti menara telekomunikasi dan server data. Melalui jaringan yang terpadu dan inovasi berkelanjutan, perusahaan berkomitmen untuk menjamin kelancaran operasional dan kemudahan penggunaan yang optimal bagi seluruh pelanggannya.

Gaisar Teknologi Bersama is a national IT company and internet service provider (ISP) offering reliable connectivity for residential to corporate users in Indonesia. Their core services include providing fiber optic and wireless network infrastructure, as well as maintenance services for critical assets like telecommunication towers and data servers. Through an integrated network and continuous innovation, the company is committed to ensuring smooth operations and optimal ease of use for all its customers.

LEGALITY

Sebagai wujud profesionalisme dan kepatuhan hukum, operasional kami telah didukung oleh legalitas yang lengkap. Kami secara resmi memiliki Izin Penyelenggaraan ISP, keanggotaan APJII, Surat Keterangan Laik Operasi (SLO), dan Nomor Induk Berusaha (NIB). Kelengkapan perizinan ini merupakan jaminan bahwa layanan yang kami berikan selalu aman, andal, dan sesuai dengan standar regulasi pemerintah.

As a proof of our professionalism and legal compliance, our operations are backed by complete legality. We officially hold an ISP Operating License, APJII Membership, a Certificate of Operation Worthiness (SLO), and a Business Identification Number (NIB). These credentials guarantee that our services are secure, reliable, and fully compliant with government regulatory standards.

Products & Services

1. Internet Service

Layanan akses internet dengan kecepatan tinggi yang andal dan stabil, didukung oleh jaringan yang tersebar luas di lebih dari 100 kota di Indonesia. Dengan dukungan teknisi kami yang profesional dan berpengalaman di bidangnya, kami selalu siap untuk menyediakan layanan konektivitas yang paling optimal kepada seluruh pengguna jasa kami demi kelancaran operasional bisnis Anda.

High-speed, reliable, and stable internet access services, supported by a widespread network across more than 100 cities in Indonesia. Backed by our professional and experienced technicians in their field, we are always ready to provide the most optimal connectivity services to all our clients for the smooth operation of your business.

- **Broadband Internet**

Internet service with shared bandwidth capacity, highly suitable for daily business operational needs at an efficient cost.

- **Dedicated Internet**

Internet service with exclusive (1:1) unshared bandwidth, guaranteeing maximum speed, stability, and performance for critical business applications.

INTERNET SERVICE

2. Managed Service

Layanan alih daya (outsource) komprehensif yang kami sediakan secara khusus untuk mendukung perusahaan Anda dalam hal pengelolaan, pengawasan, hingga perawatan kinerja infrastruktur dan sistem IT secara berkala. Serahkan seluruh kompleksitas urusan IT kepada kami agar Anda dapat memusatkan perhatian pada pengembangan produk dan ekspansi pemasaran.

A comprehensive outsource service specifically provided to support your company in terms of management, monitoring, and regular maintenance of IT infrastructure and system performance. Leave all IT complexities to us so you can focus entirely on product development and marketing expansion.

- **IT Infrastructure Management**

Comprehensive management of hardware, networks, and IT architecture to ensure they operate optimally at all times.

- **IT System Monitoring**

Active 24/7 IT system condition monitoring to detect issues early and prevent potential disruptions (downtime).

- **System Performance Maintenance**

Routine care and maintenance, including software updates and system repairs to keep performance at its peak.

MANAGED SERVICE

DATA CENTER

3. Data Center

Percayakan keamanan data-data penting dan stabilitas sistem IT Anda sepenuhnya kepada kami. **PT Gaisar Teknologi Bersama** siap memenuhi kebutuhan klien akan layanan hosting dan penyimpanan yang sangat andal, aman, dan berkinerja tinggi dengan harga yang tetap terjangkau untuk berbagai skala bisnis.

Entrust the security of your crucial data and the stability of your IT system entirely to us. PT Gaisar Teknologi Bersama is ready to fulfill clients' needs for highly reliable, secure, and high-performance hosting and storage services at an affordable price for various business scales.

- **Hosting Server**

A virtual server space rental service to store your website or application data so it can be accessed via the internet 24/7.

- **Virtual Private Server (VPS)**

A private virtual server that provides full access rights, dedicated resources, and higher security compared to standard hosting services.

- **Co-location Server**

A service to house the client's physical servers in our data center, equipped with guaranteed cooling infrastructure, security systems, and power supply.

4. IT Solution

Kami menyediakan layanan dan solusi komprehensif berbasis teknologi digital yang dirancang khusus untuk memenuhi kebutuhan perorangan, bisnis UMKM, perusahaan skala besar, ataupun instansi pemerintahan guna meningkatkan efisiensi dan keamanan operasional.

We provide comprehensive digital technology-based services and solutions specifically designed to meet the needs of individuals, SME businesses, large-scale enterprises, or government institutions to improve operational efficiency and security.

- **Security System (CCTV)**

A modern video surveillance system to monitor and record activities in your business area to enhance security standards.

- **Attendance System**

An accurate digital employee attendance tracking system, making it easier to recapitulate work hours and manage Human Resources.

- **Access Control**

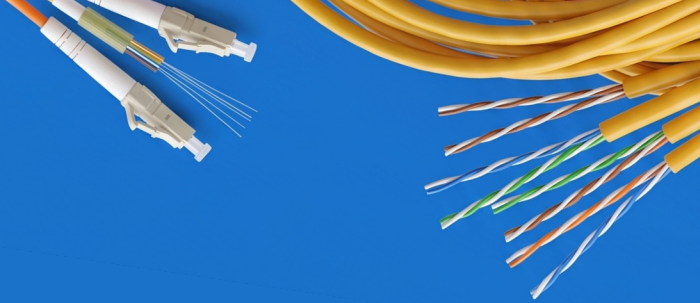

A system for restricting and managing access rights to specific rooms or areas to maintain confidentiality and physical asset security.

- **Voice over Internet Protocol (VoIP)**

Voice communication technology over the internet network, providing a more cost-effective and flexible inter-branch business telephony solution.

CONNECTIVITY

5. Connectivity

Kami menawarkan solusi komunikasi data yang terintegrasi dan aman bagi Anda yang membutuhkan jaringan privat untuk menghubungkan berbagai lokasi bisnis Anda. Layanan ini memastikan transfer data yang cepat dan rahasia di berbagai cakupan wilayah operasional Anda.

We offer integrated and secure data communication solutions for those of you who need a private network to connect your various business locations. This service ensures fast and confidential data transfer across your operational coverage areas.

- **Virtual Private Network (VPN)**

A highly secure private network connection over the public internet, allowing encrypted remote access to internal company data.

- **Innercity Interconnection**

A closed network connection service linking multiple company offices or branches located within the same city.

- **Intercity Interconnection**

A high-speed network interconnection service connecting your business branches located in different cities.

- **International Interconnection**

A stable international data communication route to connect local business networks with servers or branch offices abroad.
